

PROF / TRAC

PROF/TRAC is a 3-year EU funded project with 15 partners from eight countries, which started in March 2015. PROF/TRAC targets technical experts, architects, engineers and building managers involved in nZEB design, construction and management by developing a European training and qualification scheme as part of a life-long learning process for continuous development and up-skilling of professionals.

MAPPING THE EU SKILLS AND QUALIFICATIONS ON NEARLY ZERO ENERGY BUILDINGS

PROF/TRAC started by mapping, assessing and comparing the required skills versus the existing nZEB construction and retrofitting skills. This leads to an inventory of current educational and training programs for each profession. Currently PROF/TRAC maps skills in Spain, Croatia, Netherlands, Denmark, Czech Republic, Italy and Slovenia. This is followed by developing a European central Train-the-Trainers program to achieve an efficient use, adaption and implementation of existing training structures, training materials and accreditation schemes into national life-long learning programs.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 649473.
